Disclaimer

Every effort has been made to ensure the accuracy of the information in this book. Facts on dates in ancient history follow the conventions commonly used in Indian competitive examinations; where historians differ, this is noted. Static data (rankings, office-holders, schemes) changes over time — always verify current-affairs items against official sources before your exam. Maps in this book are schematic learning aids, not to scale, and do not depict official boundaries.

The MCQs are written in the pattern of recent competitive examinations. “Expected” tags indicate where a question type commonly appears; they are not claims that a specific question was asked in a specific year.

For students

This book is designed to be read with a pencil. Tick facts you know, circle ones you don't, and revisit the circled ones using the Brain Booster page at the end of each chapter.
